

# SAFETY APPROVED TEMPORARY RUN BUTTONS

**Improve  
Safety**

**RUN  
BUTTONS**

## Pluggable Temporary Run Button Assembly

The run button provides quick and easy means of controlling the car while work is being performed. The 4-Button Temporary Run Station has a common button, up, down and stop switch and includes a key lock. The Temporary Traveler integrates a 110v integrated receptacle for easy use of power tools.

Run Button #RB301

## Economy Run Button

Non pluggable; wires from elevator directly into the controller.

#ERB301

## Temporary Traveler

Provides a quick connection to the Run Button. Standard length is 70' but can be made to any length. Please indicate length when ordering.

Temporary Traveler #RBT302

## Controller Adapter
